DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-28, drawn to a pharmaceutical dosage form comprising a core and a thermoformable layer.

Group II, claims 29-52, drawn to a method of producing a microrelief on an ingestible dosage form.

Group III, claims 53-62, drawn to an apparatus for the continuous production of a hologram on an ingestible dosage form.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1615

The inventions of Group I and Group II are related as product and method of forming said product. The process as claimed can be used to make a different product, such as a lollipop, a candy or other food product. Furthermore, the product as claimed can be made by a different process involving the step of using a metal plate to impress a microrelief on a core of a tablet. For the above reasons the inventions listed as Group I and Group II are distinct.

The inventions of Group I and Group III are related as product made and apparatus. The apparatus as claimed is not an obvious apparatus for making the product and can be used for making a different product, such as a food product or a candy. Additionally, the product as claimed can be made using a different apparatus, such as a diffraction plastic mold. For the above reasons the inventions listed as Group I and Group III are distinct.

The inventions of Group II and Group III are related as process and apparatus for its practice. The process as claimed can be practiced using a different apparatus, such as an apparatus equipped with electrostatic jet spray deposition, a roller and a jet of air. Additionally, the apparatus as claimed can be used to practice a different process, such as depositing a hologram on paper. For the above reasons, the inventions listed as Group II and Group III are distinct.

3. A telephone call was made to Attorney Peter Manus on October 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

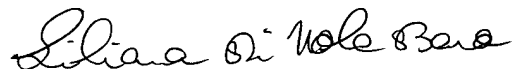

Art Unit: 1615

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liliana Di Nola-Baron whose telephone number is 703-308-8318. The examiner can normally be reached on Monday through Thursday, 5:30AM-4:00PM.
